

COMP3130 Mobile Application Development
Major Deliverable-1 (25%)
Task 1

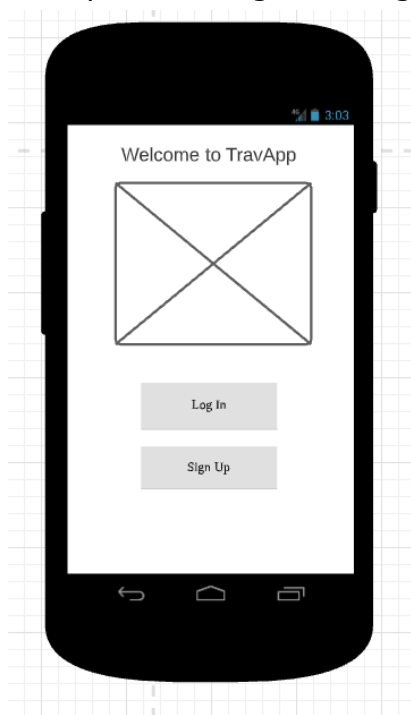

Student Name: Swarnim Madan

Student ID: 45504539

The wireframe build for the application is explained below:

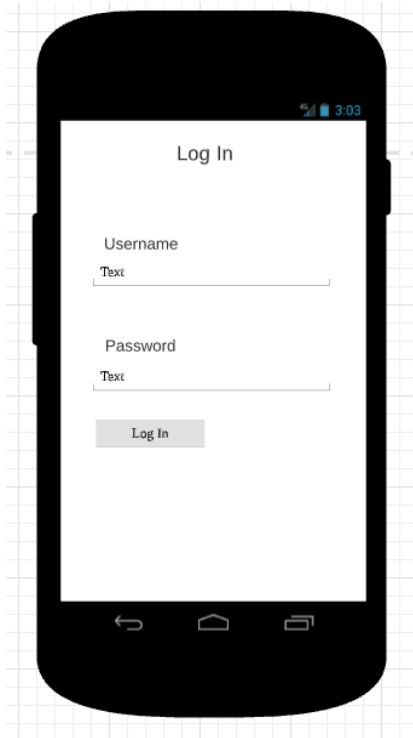

Screen 1 - The welcome screen

The user will be greeted by a welcome screen with an icon of an airplane taking off and options to login and sign up.

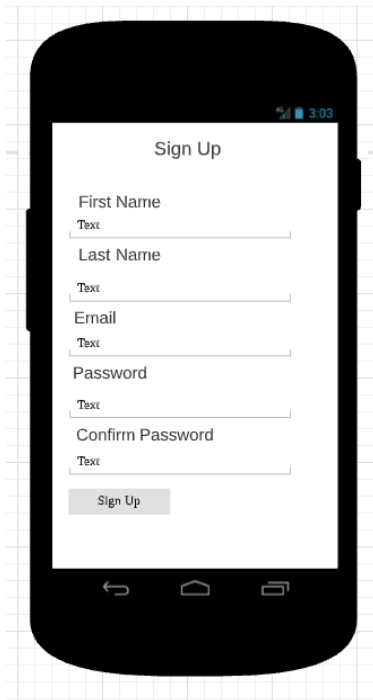

Screen 2 - The log-in screen

This is the screen where the user can login by putting in their username and password.

Screen 3 - The sign-up screen

This screen helps the user sign up for the application in case they haven't already.

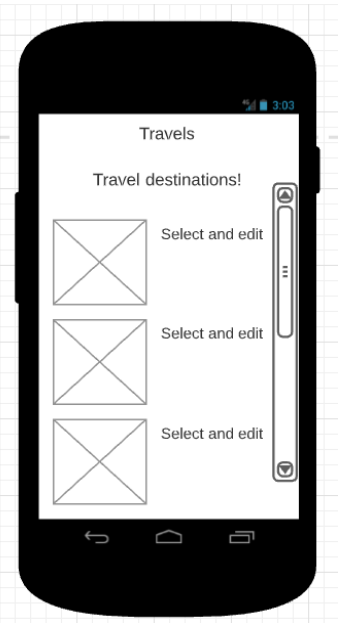

Screen 4 - Account Screen

This screen gives information about the profile picture, name, address and travel destinations already visited by the user. This screen also contains a travel option for future holiday destinations.

Screen 5 - Travel Screen

This screen helps the user select through numerous travel locations.

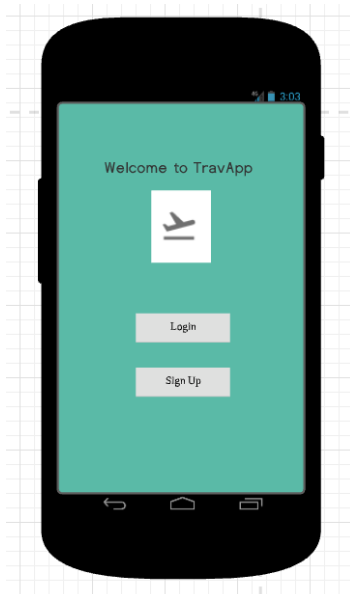

Screen 6 - More Information Screen

This screen provides more information about the travel destination selected by the user and allows them to finalise their holiday destinations.

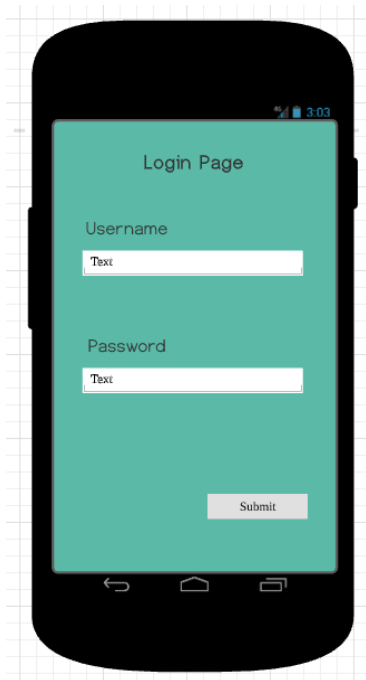

The mockup for the applications is provided below:

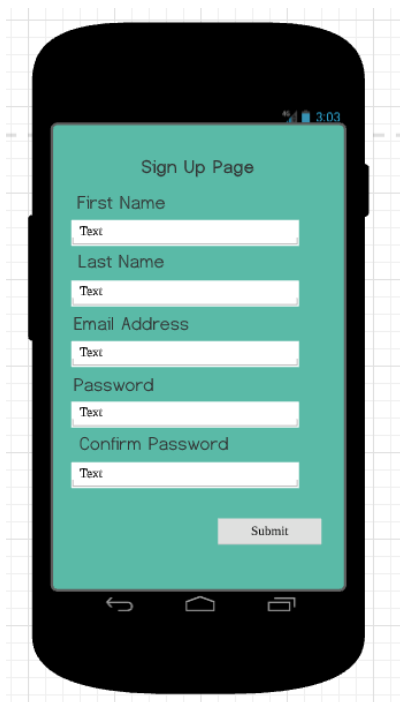

Screen 1 - The Welcome Screen

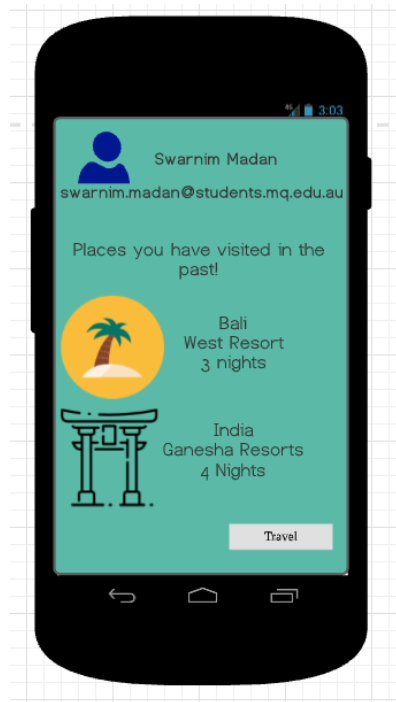

Screen 2 - The Login Screen

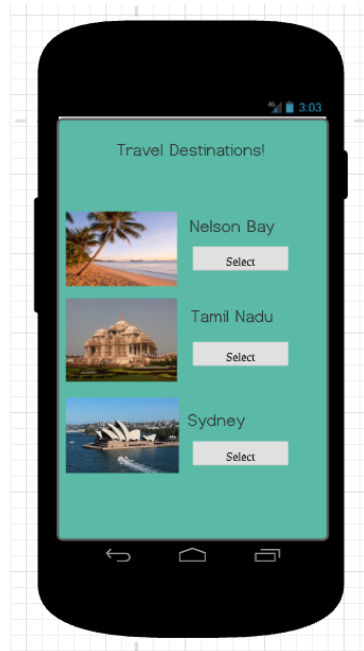

Screen 3 - The Sign-up screen

Screen 4 - The Account Screen

Screen 5 - The Travel screen

Screen 6 - The More Information Screen
